How is SAYT Engaging Young People?

These are the major components:

Young People are at the heart of all our work.

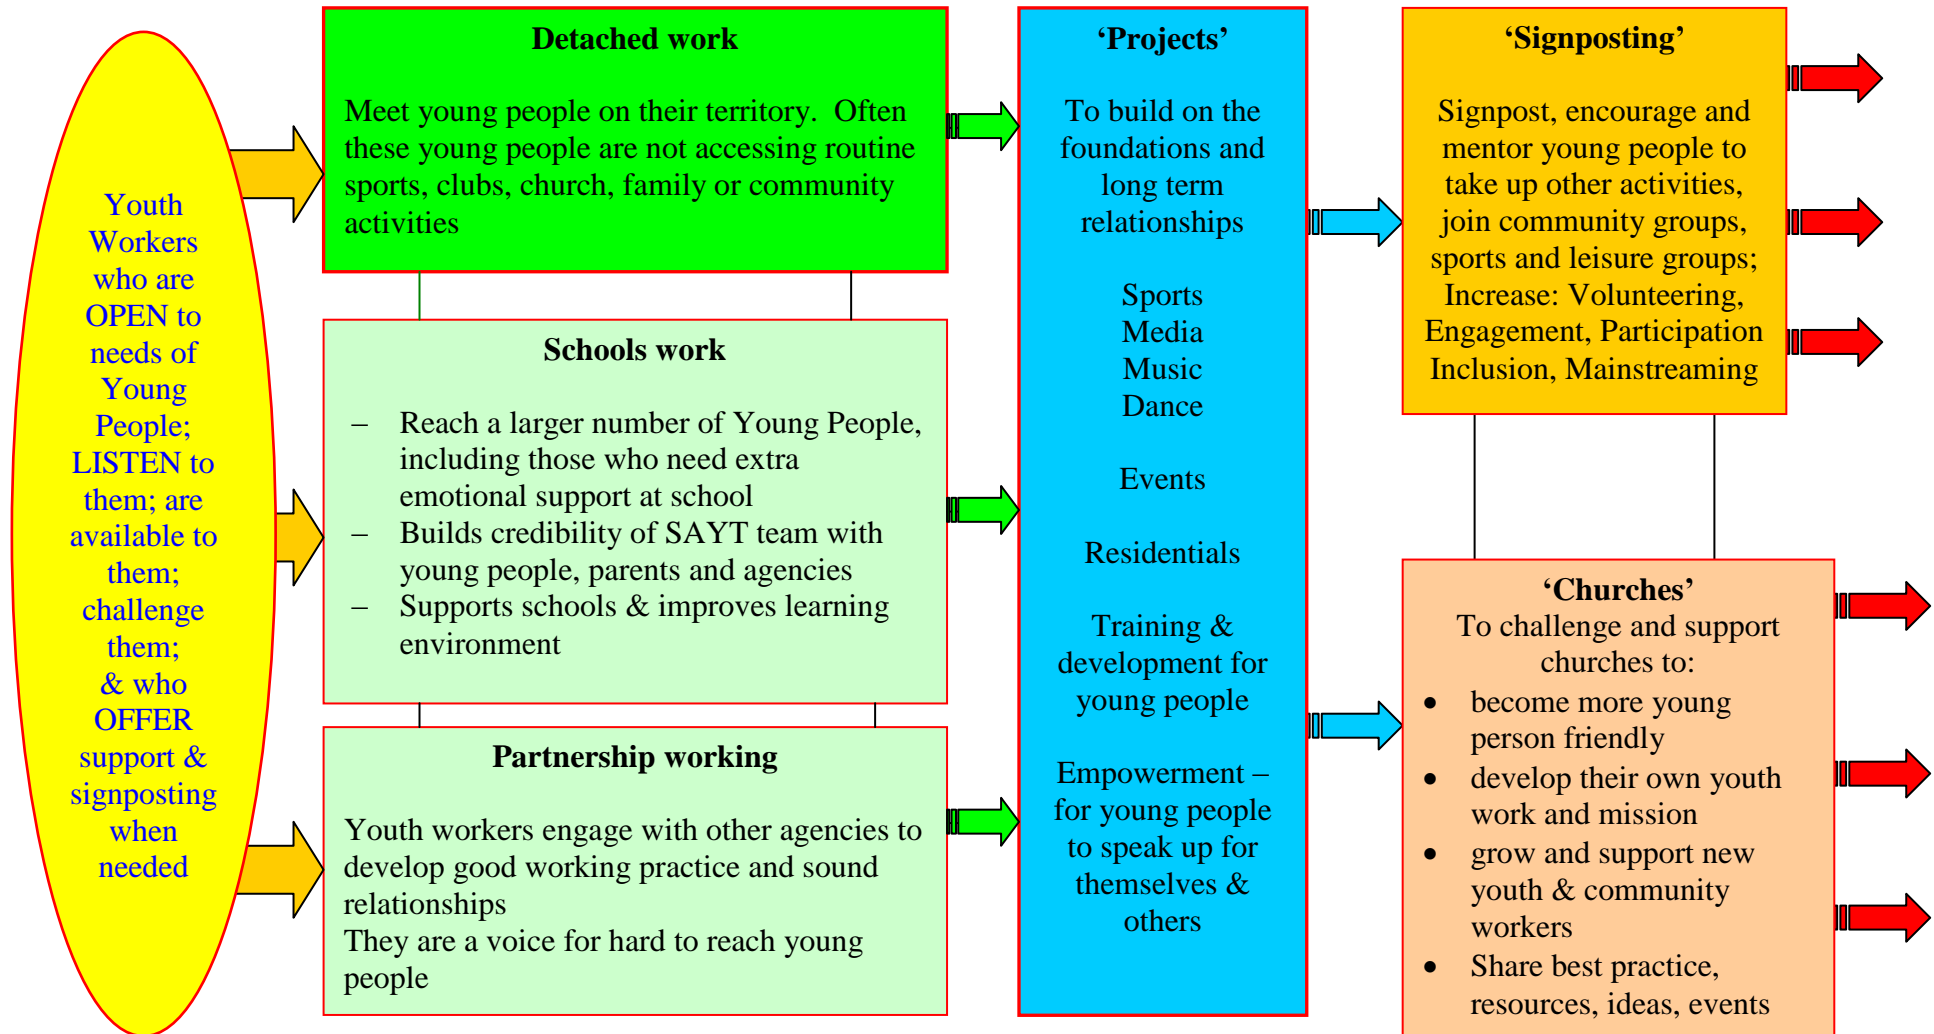

Our primary means of reaching and engaging Young People is 'Detached' Youth Work – spending time with them on the street corner, car park or wherever they want to 'hang out'

This is complemented by working within schools – which improves contacts, 'street cred' – and credibility with many other agencies.

Once these building blocks are in place, mini-projects or development projects help capitalise on sound foundations and strong relationships – leading to personal development, deeper learning and group work; **empowering young people to confidently make a positive and lasting contribution to society and our community.**
